
Wallace y Gromit: La batalla de los vegetales

A: As Raghav_Rao said, you should test the output with your own source data. Now to solve your actual problem. You can try to use this answer: `awk '{printf("$0" " ", $0)}'` Mechanisms underlying the anti-leukemic effects of sunitinib: insights from in vitro studies. Treatment options for acute myeloid leukemia (AML) have increased over the last few years, but a complete remission is achieved only for a minority of patients. Therefore, novel therapeutics and, in particular, the combination of anti-angiogenic and other targeted agents are being explored. Sunitinib is a multitargeted tyrosine kinase inhibitor (TKI), that displays potent anti-angiogenic, anti-tumor, and anti-inflammatory properties, and was first approved for the treatment of renal cell carcinoma and gastrointestinal stromal tumor. Here, the effects of sunitinib on human AML cell lines and primary AML cells are reviewed.

Primary AML cells have higher sensitivity to sunitinib than primary AML cells. The anti-tumor efficacy and induction of apoptosis in AML cells by sunitinib is mediated by various mechanisms. Sunitinib affects signal transduction cascades in leukemia cells, arrests cells in G0/G1 phase, inhibits their proliferation, induces autophagy, and activates the c-Jun N-terminal kinase pathway. These studies provide rationale for further studies of sunitinib in AML clinical trials. Port Charlotte's new cruiser, the 68-foot "SeaScape," will soon be making its debut at Monterey Bay Maritime Days. The luxury catamarans will be moored at the Sonoma Mare on Friday, Aug. 17, and Saturday, Aug. 18. The state Recreation and Park Commission voted Wednesday to green light up to 22 sailing and yachting vessels of up to 55 feet in length with limited dockage in state beaches. The Coast Guard will help enforce the new regulations for vessels with low hazard or no hazard radio masts that are tied to the floating dock or beach.
